

Successful Re-Certification AUDIT!

In the framework of the regular annual auditing process FEW Chemicals successfully passed the Re-Certification Audit according to ISO 9001:2015 and ISO 14001:2015. In order to prepare ourselves the entire Management System and handbook has been reviewed and adapted to the new requirements as defined in the 2015 standard. The new and upgraded System has been audited during February 15th and 16th by our auditor TÜV Nord. All key processes including order processing, production, quality management and dispatch of goods have been checked. Strategic business targets, risk management and the overall strategy on how to manage future challenges like demographic and changing technological trends are much more in the focus of the 2015 standard than in the past.

The auditors put very much focus on the question, how FEW Chemicals is going to handle the challenges of existing demographic trends. For an innovation driven company it is a central aspect to secure existing know-how and to make this available for our new employees.

Management of FEW Chemicals would like to thank all our employees contributing to this successful audit. Special thanks to Dr. Bianca Senns and Fred Kraft for the excellent preparation and their work during the audit. Our customers can rely on the fact, that we will maintain and further develop our high quality level also in future.
